The party made the trip to Providence in an automobile and were married there in the evening.

SUMTER MEN WIN PRIZES

Horse Exhibited by Mr. Geo. D. Shore at Greenville Wins Championship in Its Class.

Messrs. A. D. Harby and Geo. D. Shore returned from Greenville Friday night, where they had been for a week in attendance upon the Greenville Horse Show. Both were delighted with the show, which was carried out on as large a scale as anywhere in the South outside of Kentucky. They won a number of prizes, Mr. Shore's horse carrying off the championship in the five-gaited saddle horse class.

Mr. Shore's bay gelding, Tindal Wave, was exhibited by Mr. William Collins of Kentucky. The horse won two firsts, in the five-gaited saddle contest and secured the championship in this class, a beautiful trophy cup. Mr. A. D. Harby exhibited Mr. L. D. Jennings' horse, Black Chieftain, winning second prize in the combination class.

To win a prize in this show, which was probably the biggest ever held in this State, was a big honor and Sumter people should feel especially proud of the fact that horses belonging to their fellow townsmen went up against the pick of horses from Kentucky, Tennessee, North Carolina and Georgia, the show being open to the whole country, and won.

One of the features of the show was the exhibition by William Collins and Sons of North Middletown, Kentucky, of Foxy Phil, a saddle horse ridden by Mr. William Collins, Jr., which carried off every prize in its class, that for three-gaited saddle horses. Another feature which attracted attention was the fact that in every entry in which Mr. Collins rode his horse carried off first prize. There were a large number of entries and many extremely fine horses were placed on exhibition.

SOME CITY NOTES.

Repairs on Manning Avenue—Defective Hose Replaced at Factory.

Mr. Stewart of the Eureka Fire Hose Manufacturing Company was in the city Saturday morning to confer with City Manager Worthington concerning a quantity of hose purchased from them about a year ago which had proved defective. It will be remembered that Council purchased 1,500 feet of hose last April and several hundred feet of this hose has since been found to be defective.

Mr. Stewart agreed to replace 300 feet of hose which is in bad condition and to send in addition to this one hundred and fifty feet of hose to take the place of any which in future became defective before the guarantee gave out. He also stated that his company would further replace any amount of hose more than the one hundred and fifty feet which in future proved defective. The adjustment seemed perfectly satisfactory to the City Manager and the defective hose was shipped off Saturday morning. The new hose will arrive as soon as it can be shipped from the factory. Mr. Stewart stated that he was utterly unable to say what was the matter with the hose that it had proved defective, although he made a thorough examination of it.

During the week Manning avenue has undergone some much needed repairs. This is the first time that clay has been available for this work since holes were formed in the street, and for this reason the work was not done sooner.

Work has been commenced at the pumping station of the sinking of the wells at that place. The pumps have been installed and other work will be done as soon as the wells are completed.

COTTON MARKET QUIET.

PROMISE OF LITTLE ACTIVITY DURING ENSUING WEEK.

First Government Report to Be Issued Thursday, June 5th—New York Market Closes Thursday and New Orleans Market on Friday.

New Orleans, May 25.—The coming week in the cotton market does not promise much activity. In the first place the local market will close Friday night, while the New York market will close Thursday night, making a short week. In the second place the first government report on the condition of the new crop will be issued Thursday, June 5, which means that the average trader will even up this week rather than increase his commitments. The holidays will tend to intensify this desire to even up.

As yet the coming condition report has not caused very much comment and there was a surprising dearth of private estimates on condition this week. It can hardly be said that the trade has yet formed any very definite opinion of what to expect, save that the bulls seem to look for figures under the ten-year average of 79.9 per cent, while the bears look for something over 80. A year ago the percentage of condition was returned at 78.8 and two years ago at 87.8. This year the ten-year average has been selected as a fairer comparison than any, although, of course, reports and estimates during the week to come may develop entirely new opinions.

It is generally considered that this first report is altogether too early to be of any value, especially in a year like this when a part of the crop has had a late start. The pending report will carry the crop down to today.

While weather conditions this week will have no effect on the condition report, they will probably have much to do with the course of prices, especially if they are very good or very bad. Taking the belt as a whole, sufficient moisture for the time being has fallen, and what is most desired now is warm, bright weather that will bring late planted cotton up, cause good growth on young cotton and allow chopping to proceed. It is probable that more precipitation unless it comes in the form of light showers, would be regarded as highly unfavorable and would lead to higher prices, while dry and warm weather would work against the market.

Deafness Cannot Be Cured

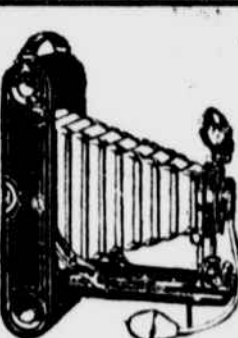

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed. Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

It Has Been Said

That with all our greatness as a nation we are a wasteful, extravagant people; that we do not take advantage of our opportunities as we should, or as we would if we lived in a different country where there were not so many of them. This is not altogether true of our community, although there are people even in our community who could get ahead faster, increase their accumulations by using a systematic plan for laying by a part of their income.
